Journal Report - Emma Wilson – AGM 2023

2022-23 saw the journal being delayed to fit in with our postponed STC however we were nominated and awarded the Outstanding Chapter Publication Award by the IAAI at the ITC in April 2022.

We have had interesting articles and content to share with the members. I would reiterate the request that those who have completed degree or masters projects put forward their research for publication. The covid years saw a reduction in the amount of research in universities and we have had fewer submissions containing original research. However I have approached some individuals that have carried out some interesting research recently and I hope to bring that to a wider audience in the next couple of issues. The Journal has been printed and posted twice per year. The electronic version of the journal is available to all members online via the members' area of the website.

Thank you to the Board for their assistance in reviewing the articles and especially to David Schudel for his assistance in reviewing the journal before it goes to print
